EDUCATION

- **Institut Teknologi Sepuluh Nopember** Surabaya, Indonesia
Bachelor of Computer in Computer Engineering; GPA: 3.43
Sept. 2013 – Sept. 2017

EXPERIENCE

- **TikTok (ByteDance)** Jakarta, Indonesia
Senior Software Engineer
May 2024 - Present
 - **Delivery - Backend:** Leading Transport Management System (TMS) expansion to UK market, managing 500K daily orders for Indonesia market and 10K daily orders for UK market. Architecting migration of Gojek and GoTo Logistics (GTL) infrastructure to ByteDance cloud platform while developing localized features for TikTok Shop partners
- **GoTo (Indonesian Super App)** Jakarta, Indonesia
Senior Software Engineer
Jan 2019 - May 2024
 - **Transport Management System - Fullstack:** Designed and built TMS from scratch managing 500K daily orders, streamlining logistics operations and improving delivery efficiency across the platform
 - **GoSend - Backend:** Developed "Single Pick-Up Multi-Drop" feature enabling cost-efficient multi-destination shipments, reducing shipping costs for users and drivers
 - **GoMart - Backend:** Optimized Elasticsearch cluster architecture for scalable product search; implemented flash sale feature driving user engagement and sales velocity
 - **GoMerchant - Backend:** Extended Ninja App platform with Midtrans payment integration; managed GoFood website for medium and enterprise merchant onboarding at scale
- **Mapan** Jakarta, Indonesia
Software Engineer
Mar 2018 - Dec 2018
 - **Ninja App - Backend:** Developed merchant onboarding application facilitating GoPay (payment) adoption and integration with Gojek (ride-hailing) ecosystem services, streamlining payment workflows; successfully onboarded 100K merchants
- **Bukalapak** Jakarta, Indonesia
System Engineer, Intern
Sep 2017 - Oct 2017
 - **DevOps Automation:** Developed server configuration monitoring scripts to detect and alert on unauthorized changes, improving infrastructure security and compliance
- **Mekari** Jakarta, Indonesia
Software Engineer, Intern
Jun 2016 - Sept 2016
 - **Frontend Development:** Implemented dynamic name card generation system for enterprise clients using sleekr.co HR platform services

PROJECTS

- **Tanggalnya.com (2021 - present):** Full-stack wedding invitation platform serving Indonesian market with RSVP management, automated email reminders, Google Sheets integration, and comprehensive CRUD operations for event planning
- **PPDB Jawa Timur (2017) and PPDB Surabaya (2016):** Large-scale student information system handling registration, document processing, and automated selection for junior and senior high school admissions across regional education departments

ADDITIONAL EXPERIENCE

- **Generasi Gigih by Gojek - Instructor (2021):** Delivered two-month intensive curriculum on industry best practices including TDD, SOLID principles, modern development tools, and cloud infrastructure to 30 students from diverse academic backgrounds

PROGRAMMING SKILLS

- **Languages:** Golang, JavaScript/TypeScript, Python, Ruby on Rails, PostgreSQL, Elixir
- **Technologies:** REST, GraphQL, Redis, Git, Docker, Vim, Kubernetes
